LOZIONE ACIDO SALICILICO + NIACINAMIDE

Anti-blemish pore minimizer
This liquid solution with a non-oily texture draws on Salicylic Acid for an outstanding purifying action, minimizing blemishes and ensuring the complementary actives penetrate the skin. Salicylic Acid is combined with Niacinamide to boost the effect, helping reduce pore size and make the complexion more luminous.
Risultati: the skin is gradually purified and freed from blemishes, pore size is progressively reduced.
Adatta a tutti i tipi di pelle, anche sensibili.

AQUAGEL ACIDO IALURONICO + CERAMIDI

Moisturizing lifting
Un trattamento in crema-gel con 4 pesi molecolari di Acido ialuronico per agire sui diversi strati cutanei e assicurare un'idratazione intensa e multi-livello. All'Acido ialuronico sono associate le Ceramidi, componenti della matrice lipidica intercellulare fondamentali per una barriera cutanea integra e funzionale, capace di trattenere l'idratazione nella pelle evitandone l'evaporazione. L'Inulina, prebiotico naturale, preserva l'integrità del microbionoma cutaneo, per una barriera epidermica sana e forte.
Risultati: la pelle è istantaneamente dissetata, protetta e rinforzata. Progressivamente, le piccole rughe e i segni di disidratazione vengono minimizzati, la superficie cutanea risulta più morbida e distesa, come luffata.
Adatta a tutti i tipi di pelle, anche sensibili.
