lifting immediato
effetto freddo
FORMULA POTENZIATA

Una nuova combinazione di attivi per una strategia globale contro la cellulite.

Effetto freddo Ispirata alla crioterapia, la formula apporta una sensazione di leggerezza, in particolare alle gambe.

Effetti aromaterapici Gli oli essenziali conferiscono vitalità e benessere.

Effetto lifting potenziato Un mix di alfa-idrossiacidi vegetali lifta immediatamente la pelle e minimizza le imperfezioni. La Centella Asiatica contrasta la perdita di elasticità e assicura un'azione lifting progressiva.

Azione anticellulite potenziata sui diversi fattori che causano l'instetismo: accumuli adiposi e alterazione del microcircolo.

Due potenti principi attivi, Pepe Rosa e Caffèina, intervengono a tre livelli sugli accumuli adiposi: •limitano la formazione di adipociti maturi •contrastano lo stoccaggio di nuovi lipidi •favoriscono l'eliminazione del grasso esistente.

Inoltre, i fitoestratti di ananas, ipocastano e mirtillo, drenanti e vaso-protettivi, associati ad un innovativo estratto di caffè verde fermentato, ricco di flavonoidi, contrastano efficacemente il ristagno dei liquidi.

La **texture** in gel è leggera, fresca e di rapido assorbimento. Per tutti i tipi di pelle.

BOOSTED FORMULA

A new combination of active ingredients for a global anticellulite strategy.

Cold effect Inspired by cryotherapy, the formula gives an immediate sensation of lightness.

Aromatherapy effects The essential oils stimulate vitality and wellbeing.

Boosted lifting effect A blend of plant-based alpha-hydroxy acids instantly lifts the skin and minimizes imperfections. Centella Asiatica combats loss of elasticity and ensures a progressive lifting action.

Boosted anticellulite action on the causes behind the problem: the buildup of localized fat and alterations of microcirculation.

Two powerful active ingredients (Pink pepper and Caffeine) act on fat deposits at three levels, •limiting the formation of mature adipocytes (fat cells) •preventing new lipids from accumulating •helping get rid of existing fat. Draining, vasoprotective plant extracts - pineapple, horse chestnut and blueberry - combined with an innovative, flavonoid-rich fermented green coffee extract stop liquids from building up.
